

VIKTORIYA VELEVA

Full-Stack Developer

Great to meet you! I'm Full-Stack Developer with a Bachelor's in Business Information Technologies from Plovdiv University. I enjoy building clean, scalable applications and transforming complex requirements into intuitive user experiences. Strong focus on performance, usability, and high-quality code, backed by a constant drive to learn, improve, and tackle new challenges in collaborative, well-structured environments.

WORK EXPERIENCE

Web Developer, Edynamix

August 2025 - Present

With my work at eDynamix, I gained experience in developing web applications using .NET and Angular. I developed skills in building and integrating REST APIs, working with databases, and creating modern and efficient frontend solutions using Angular and its ecosystem. I also improved my ability to work effectively in a team and apply best practices in software development.

Junior Full-Stack Developer, BankSoft

July 2024 - April 2025

Build and maintain large-scale financial applications for clients such as Investbank, Allianz Bank, BACB, D Bank, UniCredit Leasing, and DSK Leasing. Work with .NET, JavaScript, Vue.js, React, and Knockout.js, focusing on system stability, security, and performance. Strengthened expertise in financial technologies, complex codebase management, problem-solving, and version control (Git/SVN).

Unity Intern, TriSoft

April 2024 - June 2024

Developed a geography-based educational game introducing children to countries and capitals, enhancing my skills in structured content design, logic-driven gameplay, and creating engaging learning experiences through gamification.
